

ENTRANCE DOORS · RANGE BROCHURE

Atelier Entrance Door

Oversized aluminium entrance doors with a solid 77 mm panel, concealed hinges and laminated triple glazing.

VITROVA

Glazing, specified properly.

WHY THIS DOOR

When the standard range runs out

Standard entrance door ranges are drawn around a standard opening. Replacement and extension work rarely gives you one.

A hallway that wants the door run to the ceiling line. An opening wide enough for two sidelights on the same frame. A panel that matches the architect's elevation, not the nearest catalogue page. That is what the Atelier door is for. We reach for it when the Signature range runs out of height or width, and we price it for the project, one door at a time. Nothing in this brochure is a stock item.

Height first. Panel designs are made up to 1400 mm wide and 2600 mm tall, and door sets up to 2700 mm overall. Then width: door and sidelights are built as one frame, with sidelights added either side, more than one on a side if the opening needs it. Where the entrance calls for it, the leaf can turn on a pivot instead of hinges. Then finish. Sixty-two panel designs, any RAL colour, wood-effect decors on selected designs, stainless or black furniture.

2600 mm

Panel designs made to 2600 mm tall and 1400 mm wide; door sets up to 2700 mm overall.

One frame

Door and sidelights built together; no set width, add sidelights either side.

62

Panel designs in three families, every one made to your size.

SPECIFICATION

What is built in

None of this is an upgrade.

A 77 mm aluminium-faced panel, solid, the same face inside and out. Concealed hinges, four per door, so the outside face is clean. A five-point lock with a double-sided cylinder and five keys. Laminated outer glass on glazed panels; sidelights laminated inside and out on a warm-edge spacer. A 14.5 mm aluminium threshold. Outside, a pull bar or a lever; inside, a lever. Stainless or black.

Key figures

Panel thickness	77 mm
Frame depth	77 mm
Panel design size range	up to 1400 × 2600 mm (minimums vary by design)
Door set size	up to 2700 mm tall overall; no set width (sidelights added either side); door leaf up to 200 kg
Sidelight glazing	49 mm triple glazed, laminated both sides, Ug 0.7 W/m²K
Whole-door U-value, worked example	Uw 0.95 W/m²K on a 3750 × 2700 mm door with two sidelights
Threshold	14.5 mm low aluminium
Locking	5-point multi-point lock, SKG** rated hardware
Pull bars	40 × 40 mm square section, 500 to 2500 mm long
Pivot door leaf, system maximum	1700 × 3000 mm, 200 kg; XL frame 2500 × 4000 mm, 500 kg

Figures from the manufacturer's catalogues (aluminium system, Jul 2026; panel range, Jan 2026) and a priced door set, Nov 2026. Lead time and guarantee are confirmed on the quotation.

THE DESIGNS · ATELIER

Atelier designs, 1 to 22

Sixty-two panel designs in three families, every one made to your size. Atelier is the contemporary family: flat panels with glazed inserts, milled grooves or stainless trims. Each design is shown in a dark grey finish; glazed inserts are sandblasted glass with clear detailing unless the design says otherwise.

THE DESIGNS · PIVOT

Pivot doors

Some entrances want a door that turns rather than swings. The Atelier pivot door hangs on an offset axis instead of hinges, so a leaf up to 1700 mm wide and 3000 mm tall opens in or out, and the frame around it carries sidelights to the same line. The XL frame takes that to 2500 × 4000 mm.

The Classic panels are made in the pivot version. Beyond those, the Pivot Line: fifteen designs drawn for the pivot frame, in aluminium, quartz sinter and decor faces, with integrated LED lighting in cool or warm white and a pull handle set into the panel or standing off it.

Pivot 13

Pivot 14

Pivot 15

Pivot doors are built on a different aluminium frame from the hinged Atelier door and are priced for each project. Which contemporary Atelier and Editions designs can be made on the pivot frame is confirmed with the manufacturer at quotation; the Classic panels and the Pivot Line are. Colours shown are the manufacturer's; any RAL is available.

HARDWARE

Handles, hinges and locks

Every Atelier door leaves with a five-point lock, concealed hinges and a pull bar or lever, in stainless or black. The rest of this page is what you can change. Anything not on the quotation is priced when you ask for it.

Outside pull bars · square bar 500 to 2500 mm; other shapes to order

Round bar, cranked legs

Recessed, LED blue

Finishes: Same colour as the door · Stainless · Backlit: black, stainless or the RAL list above

Levers, hinges and locks

Inside lever, short plate

Lever, long plate

Concealed hinges

Roller hinges

5-point lock

Motorised lock

Door closer

Finishes: Levers: stainless or black · Hinges: concealed in black; roller hinges to order · Locks: 5-point as standard

Also available on request: access control built into the pull bar (keypad, card or fingerprint), a 14 mm spyhole, a letter plate, and a motorised 5-point lock. Pictures are the manufacturer's illustrations; the RAL numbers are the standard list for pull bars.

FINISH

Colour, glass and furniture

Colour. Any RAL, the same inside and out. Wood-effect decor on selected designs.

Glass. Glazed inserts are laminated on the outer face as standard. Sidelights take 49 mm triple glazing, laminated inside and out, with a toughened centre pane and a black warm-edge spacer.

Furniture. Outside: a square pull bar from 500 to 2500 mm, or a lever. Inside: a lever on a short backplate. Stainless or black. A recessed pull in stainless, black or any RAL, backlit if you want it, is available on request. Hinges are concealed, black, four per door.

One thing to tell us early

Which way the entrance faces. A dark panel in direct, unshaded sun can bow slightly in strong heat, and we would rather say so before you choose the colour than after the door is hung.

RAL 7016 Anthracite grey
Shown throughout this brochure

Black
Also the black furniture finish

Stainless furniture
Pull bars, levers and the recessed pull

Any other RAL
We confirm the swatch at order

SECURITY

Security, honestly stated

The lock and cylinder carry the SKG** mark, a Dutch hardware test standard, and the door is a solid 77 mm panel in an aluminium frame. We do not describe the Atelier door as PAS 24 or Secured by Design, because the door set has not been shown to us as tested to those standards. If your project falls under Approved Document Q, tell us before you choose and we will tell you which of our doors has the test evidence you need.

NEXT STEP

How we price it

Send us four things.

01 The structural opening, or the frame size you want made.

02 The handing, and whether the door opens in or out.

03 The design, colour and furniture from this brochure.

04 Which way the entrance faces.

Back comes a priced specification with an elevation drawing: your design laid into the leaf, your handle on it, at your size. The sizes on our order are the sizes made, so we survey before anything is ordered.

Your chosen design is laid into the leaf on the quotation drawing.
